To store the Digital pen, make sure that the tip does not touch anything, especially, do not let the pen stand in a cup or penholder with the tip down. Pressure applied to the pen tip might damage the precise configuration of the pen, it is recommended to place the pen in a pen holder or store it with the pen tip pointing upward, or place it horizontally with the pen tip free of any other objects.

**Note:** It's recommended to turn the power off by pressing the power button at top of the pen to save battery. See below about how to change batteries.
