GAOMON

Graphics Pen Display

PD1561 User Manual

Precautions

1. Please read this manual carefully before using, and keep it well for future reference.

2. Before cleaning the display please unplug the USB cable and wipe with a soft damp cloth, do not use any kind of detergents.

3. Please don't place the display near water sources such as bathtub, washbasin, sinks, washing machine, damp basement, swimming pool, etc.

4. Do not place the display on where is unstable or a height for children reaching easily in order to avoid danger.

5. Do not place the display and digital pen close to the magnetic field.

6. The grooves and holes on the back case is designed for ventilation to prevent the monitor from overheating. Please don't place the display on beds, sofas, carpets or in embedded device.

7. Only power supplies shown on the nameplate can be used for the display. If you have questions about the power supply which you are using, please consult the distributor of your display.

8. To protect your display, please switch off the power when it is not in use. During blackouts or not using for long time, please unplug the display from the socket.

9. Don't overload the socket or lengthen the power wire, which may lead to electric shocks.

10. Make sure no foreign bodies get inside the monitor through grooves and prevent liquid from splashing on the display as to prevent short-circuit or fire.

11. If the display has a breakdown, do not open the main case and try to repair it by yourself. Please ask for a service for proper repair and maintenance.

12. When the following situations occur, please unplug the power adapter and you may need a service for full repair and maintenance:

A. The power wire or plug is damaged or worn out;

B. There is liquid splashed inside of the display;

C. The display has fallen or the LCD is broken;

D. When obvious abnormalities occur to the display.

13. While getting the components replaced, you are supposed to guarantee that the repairman is using the substitute components specified by the manufacturer. Unauthorized component replacement might cause fire, electric shocks or other dangers.

Contents

1. Product Overview

1.1 Product Introduction

Thanks for choosing GAOMON® PD1561 graphics display. This is a new generation of portable desktop-level professional drawing display, which can greatly improve your work efficiency of painting and creation, and full of fun. You can freely painting and writing, depicting different lines and colors, just as the pen writes on the paper, which brings you a real shock experience.

To give you a better understanding and using of your display, please read this user manual carefully. The user manual only shows the information under Windows, unless otherwise specified, this information applies to both Windows and Macintosh systems.

	Net Weight	3KG
	Adjustable Stand	20°-80°
	OS Support	Windows 7 or later, macOS 10.12 or later

5. Trouble Shooting

5.1 Possible Breakdowns Related to DISPLAY

Abnormal Phenomena	Possible Solutions
Power indicator does not flash	*Make sure power is on *Check the socket and power cable
No signal--saving power--all black	1. Make sure the 3-in-2 cables are well connected. 2. If you use a desktop, make sure the HDMI port is plugged into the graphic card on the tower, but not into the motherboard. 3. If you use a Windows OS computer, make sure to press ''Windows+p'' on keyboard, then choose Duplicate or Extend. Don't choose Computer Only or Projector Only. 4. If there is no HDMI port on your computer, you need an extra HDMI adapter. We DON'T recommend a USB to HDMI adapter. Also we don't recommend a USB hub. We recommend DVI/ VGA/ Display Port/ Type-C/ Thunderbolt, etc to HDMI adapters.
Nothing displays at all，with no indicator light.	1.Make sure the power cord is well connected. 2.Try different power socket.
Displays wallpaper & task bar of computer monitor only.	1. It is because you are under extended mode right now. It is normal situation. 2. If you are not familiar with extended mode, we recommend you to use in Duplicate/Mirror mode. Windows OS: Press keyboard combination---windows+p---then choose Duplicate Mac OS: System Preference---Displays--- Arrangement--- Check "Mirror Displays" 3. If you decide to use in Extended mode. Make sure to choose pen display as Work Area in GAOMON Driver. It is usually ''Display 2''.
Images are blurred	Please set the display resolution with 1920 x 1080.
Lack of colors	Check the pins of the signal wire are not bent or fractured.
There is chromatic aberration	As the regional color temperature is different, so minor chromatic aberration is a normal phenomenon.

Images jitter or ripple images appear	It is likely that there is electric equipment nearby that brings about electronic interference.

5.2 Possible Breakdowns Related to FUNCTIONS

Abnormal Phenomena	Possible Solutions
Pen doesn't work and no pressure in the graphics software	1.When pen does not work in art programs only: Uninstall the driver and reinstall it. If you use Windows OS, make sure to ''run as administrator'' when installing the driver. (But not ''run as administrator'' on desktop after the driver has been well installed already) 2.When pen does not work everywhere: Try re-inserting the USB cable. Try different USB ports on computer. Try different computer.
Cursor movement is abnormal	Try re-inserting the USB cable or restarting your computer.
The side button of the pen doesn't work	When pressing the side button, please make sure that the nib didn't touch the glass surface and the distance between the nib and surface is within 10 mm
There is a deviation between the tip and the cursor	Try calibration

GAOMON driver indicates ''device connected'', but the pen doesn't respond in Mac OS 10.14 or above versions.
